

EP1066787 A1
Paperweb roll dispenser with centre feeding out
FORT JAMES FRANCE

Abstract:

Paper dispensing comprises triangular slot with top width larger than bottom width so that paper is not damaged when inserted through dispensing nozzle

Inner concave wall (64) of passage (62) comprises slot (80). Width (L1) of slot separating two opposite edges (82) near upper opening (70) is larger than width (L2) of lower end of slot, near lower opening (72). Triangular-shaped slot allows easy passage of paper strip through that slot without being compressed, and introduction through passage and lower opening.
